Products of high-tech ceramics for industry and research

Delivery programme:

The quality of the materials together with precision manufacturing based on customer-specific drawings are the distinguishing features of our products. Our possibilities include the manufacture of prototypes as well as series production.

Laboratory ceramics
Crucibles and pans for high-temperature processes

Plates and Fillets
Ballistics, wear, isolation

Tubes and rods
Insulating and thermal applications

Precision balls
In accordance with DIN 5401 and A.F.B.M.A. Application as valve balls for dosing pumps, calibration and measuring ball

Special Productions for machine and process engineering
out of high-tech ceramics: Al₂O₃, ZrO₂, SiC and Si₃N₄
